CacheSYSTEM™ 2400

The
Armor Safe
CacheSYSTEM®
2400 safe provides
cash security and much
greater employee accounta-
bility through an audit trail that
connects each transaction to a
registered user. Cash register close-out
is more efficient and error-free while
deposit preparation is reduced from hours to
just a couple of minutes.

CacheSYSTEM 2400s:

► COLLECT & SECURE CASH

Once your cash is placed in an Armor safe, you can rest assured it will stay there. Our products are designed and constructed to rigorous standards to protect each point of access and reduce your risk of robbery.

► COUNT & VALIDATE FUNDS

Each safe is equipped with industry leading bill recognition technology that provides the highest level of first-time bill acceptance and unsurpassed counterfeit detection. Counted funds are secured in cassettes for easy transport and deposit. This series may be fitted with one or two bill validators.

► AUDIT & REPORT ACTIVITY

Every transaction is recorded and tracked through each user's PIN, providing a seamless audit trail. More than 30 different types of receipts and reports can be printed on the system's high-speed printer, including end-of-day activity, cash removal, and individual user reports.

► COMMUNICATE

The CacheSYSTEM® 2400 integrates seamlessly with application service providers, allowing real-time access to analytics and transaction data remotely or from the back office.

TECHNOLOGY
